

UBC School of Audiology and Speech Sciences

# THE CHILDREN'S SPEECH DEVELOPMENT RESEARCH PROJECT IS LOOKING FOR PARTICIPANTS!

We are looking for school-aged children to help us  
find out how well they can say long words.

Children in Kindergarten up to Grade 6 can participate.

Participants will do five speech activities and  
will look at pictures for most of them.  
The activities will take about 45 minutes.

The research information will help Speech-Language Pathologists (SLPs)  
to give better assessments and therapy for children  
with speech, reading and writing problems.

 Participation location: **UBC Vancouver campus**  
or tentatively, neighbourhood site

To ask about participating, or to learn more about the study, please contact:

 Lead Researcher:  
Dr. Glenda Mason, RSLP
