School of Audiology and Speech Sciences
At the University of British Columbia

Master of Science Programs
M.Sc. in Audiology
M.Sc. in Speech-Language Pathology

Prerequisites for Future Students

Appendix 1 ..........................................................Prerequisites for Admission: Audiology
Appendix 2 ..........................................................Prerequisites for Admission: Speech-Language Pathology
Appendix 3 ..........................................................Prerequisite Academic Preparation
Appendix 4 (a).....................................................Audiology Prerequisites at Other Universities
Appendix 4 (b).....................................................Speech-Language Pathology Prerequisites at Other Universities
Appendix 5.........................................................Registration for On-line Prerequisite Courses AUDI 402 & 403
Prerequisites for Admission: Audiology

Minimum Prerequisites for Admission to the Audiology Major:

<table>
<thead>
<tr>
<th>Course Content</th>
<th>Minimum Credits*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction to Physics [energy and waves]</td>
<td>3 credits</td>
</tr>
<tr>
<td>Developmental Psychology</td>
<td>3 credits</td>
</tr>
<tr>
<td>Sensation/Perception</td>
<td>3 credits</td>
</tr>
<tr>
<td>Research Methods**</td>
<td>3 credits</td>
</tr>
<tr>
<td>Introduction to Linguistics</td>
<td>3 credits</td>
</tr>
<tr>
<td>Neuroanatomy for Audiology and Speech-Language Pathology</td>
<td>3 credits</td>
</tr>
</tbody>
</table>

*A 3-credit course is equivalent to a one-term course that meets 3 hours per week.

**Must include Research Design (primarily Research Design rather than a Statistics course)

Additional Coursework Recommended for Audiology Applicants:

For students who plan to specialize in Audiology, additional undergraduate preparation could include, for example, Brain and Behavior, Adulthood and Aging, additional Developmental Psychology, Cognitive Psychology, Counseling, Biology, Phonology, Syntax, Acoustic Phonetics, Discourse, and Statistics.
### Prerequisites for Admission: Speech Language Pathology

Minimum Prerequisites for Admission to the Speech-Language Pathology Major

<table>
<thead>
<tr>

<td>1.5 credits</td>
</tr>
</tbody>
</table>

*Courses are to be at the upper level (300 or 400) when possible. Note that most upper level courses have prerequisites at the 100 or 200 level. A 3 credit course is equivalent to a one term course which meets 3 hours per week.

**Phonetics (including transcription practice) must be covered at some point in the course of study. Students are required to provide evidence of this in their applications.

***Must include Research Design (primarily Research Design rather than a Statistics course)

**Additional Coursework Recommended for Speech-Language Pathology Applicants:**

For students majoring in Speech Sciences or Linguistics, undergraduate preparation could include additional coursework in Psychology such as Cognitive Psychology, Development, Psycholinguistics, Adulthood and Aging, and Counseling as well as Linguistics.

For students majoring in Psychology, additional undergraduate preparation could include, for example, further courses in Linguistics such as Speech Science, Semantics, Syntax, Morphology, Discourse, Sociolinguistics, and/or courses in Psychology such as those listed in the previous paragraph.
Prerequisite Academic Preparation

Applicants to the School are required to complete course work in specific areas depending on specialization (see Appendix 2) before beginning their graduate studies. Descriptions of the courses that would fulfill these content area requirements at UBC are listed below. Students from other universities should identify the courses that are as nearly equivalent as possible.

AUDIOLOGY AND SPEECH-LANGUAGE PATHOLOGY

AUDI 402 (3 credits) Neuroanatomy for Audiology and Speech-Language Pathology: An overview of neuroanatomy and functional neuroanatomy with emphasis on neuroanatomy related to hearing and speech mechanisms. IMPORTANT DATE: If you require prerequisite course content for AUDI 402, this course is offered on-line twice a year beginning in January and May. See last page for registration information.

AUDI 403 (1.5 credits) Introduction to Neurolinguistics: Addresses historical and current issues in studying the neuroanatomical substrates associated with language processing, including brain imaging, localization, and lateralization of language functions. IMPORTANT DATE: If you require prerequisite course content for AUDI 403, this course is offered on-line each year beginning in March. See last page for registration information.

LINGUISTICS (Faculty of Arts)

Introduction to Linguistics

Ling 100 – Introduction to Language and Linguistics. An introduction to the study of language as a universal and uniquely human cognitive system; what universals do all languages share and how do languages differ. An investigation of sound systems, word-building, grammatical principles, language change, dialect variation, language acquisition, neurolinguistics.

Phonology

Ling 311 – Studies in Phonology. Introduction to phonological analysis and theory, with a strong emphasis on description and analysis of data from a wide variety of languages.

Syntax

Ling 300 – Studies in Grammar. Introduction to syntactic analysis and theory, with emphasis on description and analysis of data from a wide variety of languages.

Speech Science

Ling 313 – Introduction to Linguistic Phonetics and Speech Science. The articulatory and acoustic properties of speech production and perception, including practice in phonetic transcription, instrumental recording, and the analysis of normal speech.

Phonetics

Ling 314 – Instrumental Phonetics. Physiological and/or acoustic phonetics. Focus on experimental methods and analysis techniques. Topics may include: source-filter theory; spectral and temporal acoustic analysis, inter-articulator timing and motor coordination.

Language Acquisition

Ling 451 – Acquisition of Phonology. Infant speech perception, prelinguistic phases, word phonology, early phonology, and later morphophonology. Child language data will be informed by phonological theory (e.g., syllable structure, metrical structure, harmony processes, feature geometry, underspecification). Not offered every year.

Ling 452 – Acquisition of Syntax. The logical problem of language acquisition, learnability theory, early syntactic and semantic development (e.g., semantic bootstrapping, acquisition of lexical semantics) and later syntactic and morphological development (e.g., word order, control, coreference, movement). Not offered every year.

Research Methods

### PHYSICS (Faculty of Science)

**Introduction to Physics**

- **Phys 100 – Introductory Physics.** An introduction to fundamental concepts such as force, energy, momentum, and the use of graphs and vectors in physics; geometrical optics; electricity; laboratory exercises to familiarize the student with both the phenomena and the basic laboratory instruments commonly used to measure them.

- **Phys 101 – Energy and Waves.** Conservation laws, rotational motion, simple harmonic motion, sound, fluids, heat, including biological applications.

### PSYCHOLOGY (Faculty of Arts)

**Developmental Psychology**

- **Psyc 302 – Infancy.** Human cognition, perception, motor, social, emotional needs, brain development and their interactions from birth until the emergence of language.

- **Psyc 315 – Childhood and Adolescence.** Human development from the preschool period through adolescence.

**Cognitive Psychology/Psycholinguistics**

- **Psyc 309 – Cognitive Processes.** Contribution of cognitive processes to perception, attention, and memory; cognitive development, language, thinking, and creativity.

- **Psyc 333 – Memory: Historical, Clinical and Cognitive Perspectives.** Classical and contemporary metaphors for memory and their impact on theory development.

- **Psyc 336 – The Psychology of Language I.** Psychological abilities underlying human language; language processing, lexical representation, and principles of online conversation; animal versus human communication.

**Research Methods**

- **Psyc 217 – Thinking Clearly About Psychology.** Thinking about psychological science, with an emphasis on common errors of judgment.

- **Psyc 366 – Methods in Research.** Detailed coverage of basic research methods; the design of experiments and statistical analysis; methods will be applied in laboratory and project work.

- **EPSE 481 – Introduction to Research in Education.** The nature of scientific study and essentials of survey, experimental and other empirical research designs. Designed for students proceeding to graduate work.

- **Kin 373 – Research Methods in Kinesiology.** Critical evaluation of research studies and methods with emphasis on the physical activity content.

**Sensation/Perception**

- **Psyc 367 – Sensory Systems.** Anatomy and physiology of the sensory pathways and their relation to perception.

- **Psyc 368 – Perceptual Processing.** Perceptual phenomena and their underlying brain mechanisms.
# Appendix 4 (A) Audiology

### Audiology Prerequisite Equivalents at Other Universities

This table is for reference only and is not deemed to be a complete listing of ALL courses equivalent to UBC prerequisites. Periodically, universities change the content of their courses without our knowledge. It is the student’s responsibility to ensure their coursework fulfills the content of the prerequisite courses for the UBC MSc programs. For courses not listed below, students are required to submit a full syllabus for evaluation by the Admissions Committee. Please be specific and indicate which prerequisites you would like the syllabus to be evaluated for. E.g.

**Prerequisite: Sensation/Perception, Course: Psyc367, Institution: UBC**

* = Available online at UBC as AUDI402 and AUDI403
1 = Online Course
2 = Please submit syllabus for evaluation if using as prerequisite
3 = Only one of either Cognitive Psychology OR Psycholinguistic
TO BE ELIGIBLE TO REGISTER FOR AUDI 402 and/or AUDI 403:
Ensure that you have completed (or are currently completing):
For AUDI 402, at least ONE of the following prerequisite(s):
  • Sensation (UBC Course: Psyc: 367) or equivalent
  • Perception (UBC Course: Psyc: 368) or equivalent
  • Speech Science (UBC Course: LING 313 and LING 314) or equivalent
  • 4th year students who have completed both Anatomy & Physiology
  • Biopsychology
  • Neuropsychology
For AUDI 403 ALL of the following prerequisites:
  • Linguistic Theory and Analysis I or equivalent (UBC Course: LING 200)
  • Linguistic Theory and Analysis II or equivalent (UBC Course: LING 201)
  • Neuroanatomy or equivalent (UBC Course: AUDI 402—can be taken concurrently with AUDI 403)

REGISTRATION ELIGIBILITY AND STUDENT RESPONSIBILITY
Students who wish to take AUDI 402 and/or 403 must meet the above prerequisite requirements prior to registering for each course. **It is each student’s responsibility to ensure he/she meets these requirements.** Failure to meet these requirements may result in inadequate preparation and background for successfully completing these courses. In other words, consequences of registering without the required background knowledge/skills (e.g., not having adequate content area knowledge or not having sufficient English proficiency) may include failing individual components of the course or the entire course.

If a student is unsure whether their coursework meets our 402 or 403 prerequisites, they should inquire with their home institution’s undergraduate advisor. We are not able to provide consultation on other institutions’ course equivalences.

Currently attending UBC students:
If you are currently a UBC student, you can register for AUDI 402 and/or 403 online via your SSC account. You can view the available sections on the online course schedule.

Previously attended UBC students:
If you have graduated or previously applied to, been admitted to or have studied at UBC, please send an email to non.degree@ubc.ca with your full name, your date of birth and your UBC student number along with the request to be granted eligibility as an Unclassified student. You will then be able to register for the courses on the SSC.

Non-UBC students:
If you are not currently a UBC student, please follow one of the options below depending on your eligibility.

A. Visiting Student: Currently enrolled in a bachelor’s degree program at a recognized institution
   You will need to submit an application online to become a Visiting Student. This process also requires the submission of a Letter of Permission issued from your institution.

B. Unclassified Student: Completed a bachelor’s degree from a recognized institution
   You will need to submit an application online to become an Unclassified Student.
General Deadlines:

<table>
<thead>
<tr>
<th>Course Start</th>
<th>Application Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>September (Winter Session Term 1)</td>
<td>Mid-July *</td>
</tr>
<tr>
<td>January (Winter Session Term 2)</td>
<td>Mid-July *</td>
</tr>
<tr>
<td>May (Summer Session Term 1/2)</td>
<td>Mid-March **</td>
</tr>
</tbody>
</table>

* We recommend that students apply no later than late June if applying for AUDI 402 (course date starting January) or AUDI 403 (course date starting February).
** We recommend that students apply no later than late February if applying for AUDI 402 (course date starting May).

For specific application deadlines, please refer to: [https://students.ubc.ca/enrolment/registration/registration-dates](https://students.ubc.ca/enrolment/registration/registration-dates)

Tuition for Non-Degree Studies
Acceptance deposit of $500 (domestic students) or of $1000 (international students) is NON-REFUNDABLE and will be applied as credit towards assessed tuition fees.
