| 13 October 2021| May Elbar, UBC PhD student in audiology  
Research proposal: Long term health effects of COVID-19 on the auditory and vestibular system                                                                                      | In-person        |
| 27 October 2021| *No colloquium: Research Collaborative scheduled.*                                                                                                                                                       |                  |
| 3 November 2021| Larry Mroz and Lynne Feehan of the BC Support Unit  
**Patient engagement in research ** **ZOOM ONLY** **²**                                                                                                                                 | Zoom             |
| 17 November 2021| Richard H. Wilson, researcher at US Dept. of Veteran's Affairs  
Q&A: NU-6 and speech audiometry stimuli development                                                                                                                                                    | Zoom             |
| 24 November 2021| *No colloquium: Research Collaborative scheduled.*                                                                                                                                                       |                  |
| 8 December 2021| Phoebe Wong, UBC PhD student in interdisciplinary studies  
Research proposal: Development of speech audiometry stimuli in Inuktitut                                                                                                                                | In-person        |
| 12 January 2022| May Bernhardt, UBC professor of speech-language pathology  
Phonological assessment and intervention in the multilingual context                                                                                                                                | Zoom             |
| 26 January 2022| Sijpke Pijl, UBC professor of audiology  
Perception of variably tuned melodies by cochlear implant listeners                                                                                                                                     | Zoom if masks mandated |
| 9 February 2022| Rachel Soo, PhD candidate in linguistics & Philip Monahan, professor of linguistics at University of Toronto  
Topic TBD                                                                                                                                  | Zoom             |
| 16 February 2022| *No colloquium: Research Collaborative scheduled.*                                                                                                                                                    |                  |
| 9 March 2022   | UBC SASS Child Language and Cognition Lab  
Topic TBD                                                                                                                                             | TBD              |
| 30 March 2022  | *No colloquium: Research Collaborative scheduled.*                                                                                                                                                    |                  |
| 6 April 2022   | Molly Babel, UBC professor of linguistics & Sarah Cheung, MSc student in speech-language pathology at University of Toronto  
**Own-voice benefit in early Cantonese-English bilinguals**                                                                                   | TBD              |
| 13 April 2022  | Ronald Nkansah Adjeku, UBC audiology PhD candidate  
Frequency and place specificity of the human auditory brainstem responses to NB CE-Chirp® LS in adults with normal hearing                                                                                  | Zoom             |
| 20 April 2022  | *No colloquium: Research Collaborative scheduled.*                                                                                                                                                    |                  |

To attend the colloquium on Zoom, please go to [https://ubc.ca1.qualtrics.com/jfe/form/SV_1Xp98RQwtlx1fH8](https://ubc.ca1.qualtrics.com/jfe/form/SV_1Xp98RQwtlx1fH8) to fill out the survey so we can email you the Zoom link.

¹ Format refers to whether the speaker will present in person or via Zoom. The audience can attend in-person presentations in zoom or in person but can only attend Zoom presentations on Zoom.

² The exception is that the November 3 event can only be attended via Zoom.
